About Viva Gold Corp

The Tonopah Gold Project sits in the middle of gold mining country and controls a major land position on the prolific Walker Lane Trend in Western Nevada. Viva has consistently grown its resources since 2017 and has recently completed a new drill program to further define and grow the current resource base. Assays are pending. The Company plans to update the resource model and initiate Pre-Feasibility Study in 2024, both of which are major catalysts and value creation events for shareholders. The Tonopah Gold Project has all the hallmarks of a successful mining development project as key infrastructure is in place and is supported by compelling economic studies.

Viva Gold is led by CEO James Hesketh, a 40-year veteran in the mining space who has led the development and construction of eight other mines around the world throughout his career. Jim has surrounded himself with equally experienced mining professionals both on the management team and the board.
